

Who We Are

Innovative has been providing technology solutions to businesses and organizations since 1989. We work as your technology advocate to design, deliver and deploy the best solution for your enterprise.

Our solutions answer today's demand for high availability and optimal performance in a digital environment of ever-increasing complexity. We partner with the industry's most innovative and trusted providers to deliver a comprehensive solution along with a single point of accountability to guarantee results.

Solution Offerings

IBM Systems and Services

As a Premier Business Partner with IBM, Innovative can offer a variety of system solutions to match your company's specific needs to maximize productivity and improve your bottom line.

ERP Infrastructure

The Innovative team specializes in building ERP infrastructure that will provide optimal performance for your ERP applications. Our partnerships with SAP and Oracle (including PeopleSoft and JD Edwards) give us the subject matter expertise to get the job done right.

Business Continuity and Disaster Recovery

Innovative designs, delivers, and implements Business Continuity solutions to help your organization recover and restore interrupted critical operational functions quickly after a disaster or extended disruption. Our partnerships with Vision Solutions, Double-Take Software, SafeData, STORServer and EVault mean we can provide the ideal solution for your company.

Enterprise Backup / Recovery and Electronic Vaulting

Online backup and instantaneous restore have never been easier, thanks to STORServer and EVault. Innovative has partnered with these industry leaders to provide the right solution for companies wanting to protect their business-critical data.

Network Optimization and Web Application Acceleration

Innovative builds high-performance network infrastructure that delivers maximum application performance by partnering with Juniper Networks. Together we provide integrated products and services that help your company meet the specific challenges of application performance, secure access and network infrastructure.

Content Management

Information can be considered the single most important element of any successful business. Innovative offers a comprehensive portfolio of IBM Content Management Solutions to allow access to all your company's non-digital information.

The Innovative Advantage

We are your data availability and business continuity experts. We'll evaluate your company's needs and match them with the appropriate technology. Our detailed planning and flawless execution ensure you receive an unsurpassed solution for your enterprise. The results are increased productivity and an improved bottom line.

For the best technology solutions, get the **Innovative advantage**.
